

# proxSafe *loxx* 4

## racx module

proxSafe loxx is a module for the proxSafe racx System comprising 4 drawers. This module can store items such as car keys, cameras or mobile phones. The contents of the drawer are monitored by a keyTag.

The proxSafe loxx is operated via a proxSafe user terminal. After successful authorization, the requested drawer is released and indicated by LED. It can then be opened by finger touch. Also by key return the drawer is being illuminated in order to guide the user to the right position.

proxSafe loxx is equipped with proxCylinders that identify the enclosed items by a proxSafe keyTag. The proxCylinder provides reliable, contactless identification of the tag which is connected to the stored item.

Up to 8 proxSafe loxx 4 modules can be mounted into a proxSafe racx Housing with 16 U and 18 proxSafe loxx 4 modules fit in a housing with 36 U.

### Ihre Vorteile auf einen Blick

- Protects and secures your keys and valuables by single access
- Robust appearance
- Prepared for installation in racx System
- Monitors each compartment in case of breaking in with a collection of alarm messages
- Electrical Emergency opening

- Fail-Safe Opening - The drawers of the proxSafe system are not fully released after an electronic command but will open only after a user has touched the door. Thus unintended opening of the drawers can be avoided in case no user is present

### Technical Data

Dimensions (mm):	446 x 88,5 x 339, 2 height units in racx housing
Inside Dimensions of drawers (mm):	87 x 69 x 202
Material:	sheet metal St. 12.03
Weight:	approx. 23 kg
Mounting:	in racx housing
Voltage supply:	12 V/DC
Current consumption:	1A
Interface:	RS485/deBUS (from backplane to peripheral devices)

### Compatible with

- proxSafe racx housing
- proxSafe keyTag kit
